

STANDARD EQUIPMENT

- 100 W audio signal generator
- beacon bar
- mobile radiotelephone
- independent cabin heating
- cabin air conditioning
- light wave
- platform for powering radiotelephones and flashlights
- slow-fall roof mechanism for ladder transport
- equipment mounting system with pull-out trays

OPTIONAL EQUIPMENT

- lighting mast with LED floodlights
- power generator
- power winch
- firefighting and rescue equipment

- independent heating of the pump compartment
- hygienic kit

CHASSIS

- type - IVECO DAILY 70 C 18
- power: - 180 HP (132 kW)
- drive: - 4 x 2 with differential lock
- GVW: - 7.0 tons
- cabin: - 6-person, integrated, 1+1+4 seat arrangement

RESCUE AND EXTINGUISHING BODY

- construction:
  - body construction made of anodized bolted aluminium profiles /ALUFIRE II/
  - construction and sheathing: anodized aluminium glued to the structure
- body:
  - body covered with foil in RAL 3000 colour
  - aluminium shutters with tubular closure
  - storage compartments arrangement: 5 (2+2+1)
  - LED lighting technology

TRUCK DIMENSIONS

- length width - 7000 mm
- height - 2300 mm
- 2700 mm

TANK WATER

- capacity - 1000 l (composite)

SYSTEM

- motor pump: - JOHSTADT type M 15/10 / TOHATSU type M16/8 / high-pressure pump-motorunit
- start-up: - electric and manual
- performance: - 2000 l/min at 8 bar pressure
- : attack: - quick attack, manual/electric coiling with a length of 50 m with a universal nozzle with a capacity of 100 l/min
